ELECTRONIC PRESSURE SENSITIVE TAPE DISPENSER

BABY UMET 75

ELECTRONIC PRESSURE SENSITIVE TAPE DISPENSER**BABY UMET 75**

- ✓ It dispenses strips of pressure sensitive tape
- ✓ DC running and DC control circuits – 24 V
- ✓ 1-phase power supply: 50 or 60 Hz
- ✓ Double insulation and ground wire
- ✓ Fully protected parts for better operator protection
- ✓ Special blade for manual tape cut
- ✓ Metal frame with painted, burnished and zined parts against corrosion
- ✓ Mechanical blade protection against accidental contacts, controlled electronically
- ✓ Precise pre-set measures through electronic control of tape length
- ✓ It cuts ALL types of adhesive tape: plain, reinforced and special tapes
- ✓ Dispenser in conformity with EEC directives

FUNCTIONS

- Three lead functions:
 - a) Pre-set length of tape cut: from cm.5 to cm. 130
 - b) Free measure: from cm.5 to infinity
 - c) Embodied repeater which works on the pre-set length (after the cut another strip comes out automatically)
- Blade protection against accidental contacts:

After tape cut blade is automatically protected; the same happens, with a 15 second delay with the repeater function when tape is not taken away.

The blade protection system works even with lack of power supply, both in case of switch-off and in case of troubleshooting
- Light alert – red led flashing: indicates blade is unprotected

TECHNICAL FEATURES

Machine dimensions:	mm. 155x270xh205 approx.
Weight:	Kg. 6 about
For pressure sensitive tape rolls:	int. Ø mm.76 est. Ø up to 190 mm. max (about 330 mt. of standard tape for packing) Width: from mm. 15 to mm. 75
Power supply	: Europe: 230 V – 50 Hz 1-phase 50 VA USA: 115 V – 60 Hz 1-phase 50 VA
